_____

When it comes to completing a manuscript, authors have many options available. Book editors help bring a manuscript to its final state before a published copy can be in a reader’s hands. This means checking a book for typos, word usage, flow, structure and more. Professional Book Editors go a step beyond providing an eye for correction by noting areas of a book that could use more clarity or structural changes.
Just as a book must be edited for readers, a book also must be laid out for readers. This involves hiring a Book Layout Designer who ensures that text on the page is presented in a manner that is easy on the eyes, while providing adequate spacing. Book Layout Designers complement professional editing to ensure the reader is pleased with the end product of a book.
